These High Capacity Classes are labeled with a # sign after their class name in the Program Guide. These classes will also be marked with a # sign on our fitness class grid. Stop by the Member Service desk at your Y up to 30-minutes prior to that class to obtain your ticket.

PLEASE NOTE: Y Members and General Public will still need to register during session registration weeks for ALL Water Fitness and Small Group Personal Training Classes.

CONVENIENT. FLEXIBLE. EXPANDED OPTIONS.

You will find the most current display of class availability on our YMCA of the Fox Cities APP. The app is available for the iPhone and Android and can be downloaded at the Google PlayStore or iTunes Store. We will continue to provide a printed form of the traditional Fitness Class Grid at all five YMCA of the Fox Cities locations. For those who want to review or print the entire fitness schedule, or selected pages of our program guide, please visit our website www.ymcafoxcities.org.

MINDFUL MOVEMENT YOGA LEVEL 1 (APY)

In this Vinyasa flow class we remove the momentum from the transitions and focus on more breath. Then, the large muscle groups no longer can support the pose by themselves and the supportive muscle groups must pitch in to support the body. The results are more core activation, stronger connection to the body and the ability to engage in much deeper, smoother, longer breath. This process creates a complete change in how we carry ourselves and translates into all our activities outside the Yoga room.

MINDFUL MOVEMENT YOGA LEVEL 2 (APY)

In this Vinyasa flow class, we use the same process as Level I, but we take the poses to a different level and challenge those students who are ready. This may include more difficult poses such as headstands, arm balances and other more challenging poses (all poses are optional as we learn to listen to our bodies).

MOVING FOR BETTER BALANCE (ACY) – AOA FRIENDLY

A falls prevention program that uses the principles and movements of Tai Chi in helping individuals improve their balance and increase their confidence in doing everyday activities. There are 8 single forms in the program, all of which are derived from the traditional, well-known, 24-form Yang Style Tai Chi but tailored to those who wish to improve balance and mobility, and consequently, reduce the risk of falling.

PIYO™ LIVE (APY, ACY, FWY, HVY, NMY)

PiYo™ is a strength workout using a unique combination of strength conditioning, flexibility and dynamic balance with hints of Yoga and Pilates. Fun music and rhythmic choreography will make you sweat.

PILATES (APY, HVY, NMY)

Pilates workouts focus first on developing strength through the core including the back, abdomen and hips. Flow through a series of dynamic movements that concentrate not only on strength but also flexibility and coordination to create a stronger, leaner you. Pilates is a tool to educate the body to have better posture and move in a more efficient way.

PILATES YOGA FUSION (ACY, APY, HVY)

Get the core strengthening of Pilates combined with the flexibility and stability gained through yoga. The beginner level will introduce the basic principles of yoga and the Pilates method. The intermediate level will be a continuation of those skills learned in the beginner level.

POWER VINYASA YOGA (ACY, APY, FWY, HVY, NMY)

Experience shifts energetically, muscularly, mentally and emotionally. A vigorous series of poses which flow from one pose to the next incorporating breath, gaze and abdominal control. Increase your strength, flexibility, stamina and cardiovascular endurance. This type of yoga is suitable for all - from beginner to advanced levels.

RESTORATIVE/YIN YOGA (APY, NMY)

Relax and renew with a meditative series of restorative postures. This is a gentle, calming style of yoga that uses props to support the body to deepen the benefits of poses. It is a soothing, nurturing practice that promotes a healthier and happier you. Encourages students to explore range of movement and increase body awareness using breathing techniques and meditation for students of all levels.

SIMPLY YOGA (FWY) – AOA FRIENDLY

This class is formatted for students who like to practice vinyasa (flow) yoga but are not able to transition from standing to floor postures repetitively. Floor work is required. Walls and chairs can be used to assist in standing balancing postures. If you have never practiced yoga before this will offer you the opportunity to learn the postures from an upright standing position.

SLOW FLOW YOGA (ACY, APY, FWY, HVY) – AOA FRIENDLY

Enjoy a gently-paced flow of yoga poses – pausing to focus on breath and body-mind control. Increase your strength, flexibility and balance. Excellent yoga choice for beginners and seniors!

Train your body to get ready for a race, game, or other event with drills that work your body as a whole, making you efficient, strong, and balanced. This class requires previous TRX experience.

TRX® BOOT CAMP (ACY)

Check "lazy" at the door when you step into this workout. This class incorporates suspension training, various other pieces of training equipment and unconventional "Boot Camp" style drills.

TRX® Cycle (ACY)

Come take the class that combines the best of both TRX and cardio! This class will be half TRX and half on a bike. It will give you a total body workout that torches the calories!

TRX® PLUS (APY)

Formerly TRX Boot Camp. Check "lazy" at the door when you step into this workout. This class incorporates suspension training and unconventional "Boot Camp" style drills.

TRX® FLOW (APY) - NEW

This mobility and core-focused workout combines yoga & pilates-inspired movements on the TRX Suspension Trainer with more traditional strength, stability and flexibility exercises. The Suspension Trainer provides added leverage for more advanced participants to push deeper while also providing greater stability for less mobile or strong participants. A joint-by-joint approach seamlessly blends these approaches into flowing postures designed to increase mobility, improve performance and accelerate recovery.

TRX® TRAINING (ACY, APY, FWY, NMY)

TRX® Suspension Training will build strength, balance, flexibility and core stability through unique and challenging exercises. These dynamic total body exercises utilize the TRX® Suspension trainer, stability balls and your own body weight for maximum results in a minimum amount of time. Appropriate for all fitness levels.
